

By enacting the LPFM to have priority over current FM translator service, would cause millions of listeners to NOT be able to listen to K-LOVE, which is a positive, encouraging radio station. It is station for the whole family, and it is family friendly as well. I know that there will NOT be anything said on the K-LOVE station that I wouldn't want my children to hear, which is not the case with so many secular radio stations. I listen to the local K-LOVE station every day and helps to start my day on a positive note and also encourages me through out the day while at work or home. I hear testimonies of "real" people that listen to KLOVE and how much they benefit from having this station in their community. This station also benefits the community by sharing information about local activities coming to our area, so that we will not miss them. KLOVE also prays for their listeners and gives us a 1-800 number to call if we have prayer requests. There is not any secular radio stations that show an interest in their listeners in this way. Just to know that someone is praying for you, can sometimes make your burden lighter. KLOVE is sponsored by Millions of listeners instead of commercials, so this is something that we really want to hear. Please do not take away our ability to hear our radio station that could very well just help us make it through the day or have us hear a song that is just what we needed to hear at that particular moment. Thank you for your time in reading this.
